### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach a fastener wherein the pair of finger members are spaced apart by a slot at at least a portion of a second end of said members, and form a tip at an integral first end of said members, with first and second sets of teeth projecting outwardly in opposite directions along a portion of respective first and second finger members, further including either:

(A) with the fingers substantially coplanar at said first end and twisted relative to one another at said second end,. OR

(B) with the 1<sup>st</sup> and 2<sup>nd</sup> sets of teeth extending along the first and second finger members directly from the inner sidewalls of said finger members, OR

(C) The method of using the fasteners described in (A) above.

2. Note that (B), correlating to independent claim 29, having the first and second sets of teeth extending along portions of respective first and second finger members **directly** from said inner sidewalls, requires at least the base or a portion of the teeth of the first and second sets of teeth to be directly adjacent, or touching, the boundary of the respective inner sidewalls at the slot – that is, viewing Fig 3, teeth 62 come out of the page.

3. Examiner notes for the record the exceptional job in presenting application, and thorough job in disclosing relevant prior art. Applicant is correct that the Oath/Declaration was correct as filed.
